

LS302 MONOLITHIC DUAL NPN TRANSISTOR

Linear Systems High Voltage Super-Beta Monolithic Dual NPN

The LS302 is a monolithic pair of high voltage Super-Beta NPN transistors mounted in a single P-DIP package. The monolithic dual chip design reduces parasitics and gives better performance while ensuring extremely tight matching.

The 8 Pin P-DIP provides ease of manufacturing, and the symmetrical pinout prevents improper orientation.

(See Packaging Information).
